

# EPS<sup>®</sup> 700

# DATA SHEET

## Description

EPS<sup>®</sup> 700 is a versatile and robust pure acrylic polymer in water with good film properties and excellent durability.

## Properties

EPS<sup>®</sup> 700 is a binder for general purpose architectural binder for both matt and sheen paints for interior and exterior applications. The product has excellent adhesion to multiple substrates including aged alkyds. The product can also be used in wood stain applications.

## Physical data

Solids by weight [%]:	50.0 ± 1
Viscosity, 23 °C [mPa·s]: (Brookfield, Spindle 2)	< 500
pH value [-]:	7.5 – 8.5

## Typical values

MFFT [°C]:	+ 17
Density @ 20 °C [kg/m <sup>3</sup> ]:	1060

## Storage

EPS<sup>®</sup> 700 should be stored in a closed container at a dry place at storage temperatures between 5 °C and 30 °C.

## Stability

Under the above mentioned storage condition the stability will be 6 months ex works.
